## Transit KT

Trolley

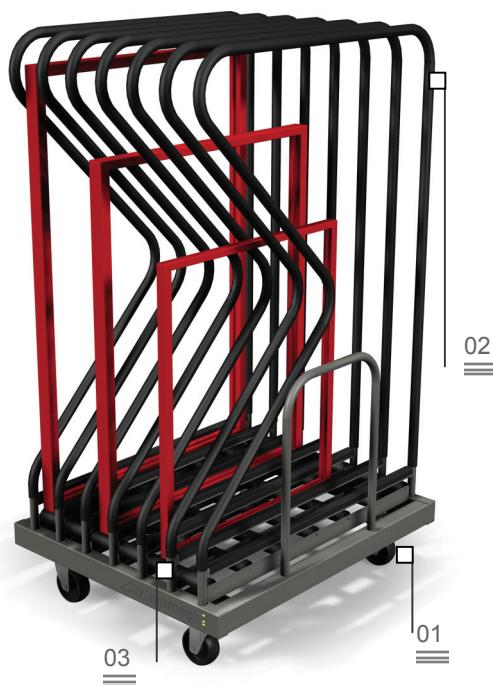

Swivelling castors

01

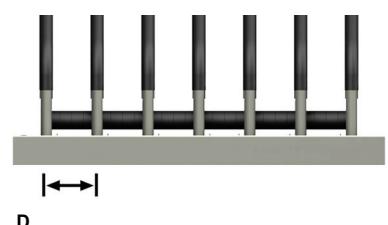

Side contact surfaces

02

A correct flow of materials, whether semi-finished or finished products, or parts in the assembly phase, plays an important role in rationalizing and optimizing the production cycle. The Emmegi Logistics line offers companies a concrete solution to all storage, handling and assembly problems.

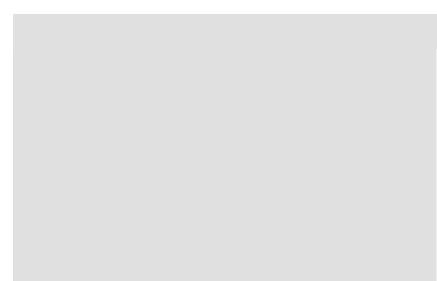

Transit KT is a trolley for handling and storing frames and finished doors/windows. The base has a roller conveyor to make heavy or bulky workpieces easier to handle.

# Transit KT

## Trolley

**01**

### Swivelling castors

The trolley has 2 fixed castors and 2 swivelling castors with brakes which ensure great mobility and easy handling. The brakes enable it to be locked in position in the various work areas.

**02**

### Side contact surfaces

All contact surfaces are coated with soft anti-slip PVC which prevents damage to them when the profiles are put in position.

**03**

### Roller conveyor

A fixed roller conveyor made up of rollers mounted on a rod may be used to move the frame, thus ensuring smooth movement and easy handling.

#### TECHNICAL CHARACTERISTICS

Depth of compartments (mm)	1160
Width of compartment (mm)	100 ÷ 160
Number of compartments	5 ÷ 15
Designed for use with K-Rail	
Number and width of compartments depending on model	
Base with roller conveyor	
Soft anti-slipPVC contact surfaces	
Push handle	
Castors (mm), two swivelling with brake	ø 150
